Business Analytics Principles, Concepts, and Applications with SAS: What, Why, and How (FT Press Analytics) By Marc J. Schniederjans, Dara G. Schniederjans, Christopher M. Starkey

Learn everything you need to know to start using business analytics and integrating it throughout your organization.

Business Analytics Principles, Concepts, and Applications with SAS brings together a complete, integrated package of knowledge for newcomers to the subject. The authors present an up-to-date view of what business analytics is, why it is so valuable, and most importantly, how it is used. They combine essential conceptual content with clear explanations of the tools, techniques, and methodologies actually used to implement modern business analytics initiatives.

They offer a proven step-wise approach to designing an analytics program, and successfully integrating it into your organization, so it effectively provides intelligence for competitive advantage in decision making.

Using step-by-step examples, the authors identify common challenges that can be addressed by business analytics, illustrate each type of analytics (descriptive, prescriptive, and predictive), and guide users in undertaking their own projects. Illustrating the real-world use of statistical, information systems, and management science methodologies, these examples help readers successfully apply the methods they are learning.

Unlike most competitive guides, this text demonstrates the use of SAS software, permitting instructors to spend less time teaching software and more time focusing on business analytics itself.

Business Analytics Principles, Concepts, and Applications with SAS will be a valuable resource for all beginning-to-intermediate level business analysts and business analytics managers; for MBA/Masters' degree students in the field; and for advanced undergraduates majoring in statistics, applied mathematics, or

engineering/operations research.

Editorial Review

From the Back Cover

Today's Most Complete, Up-to-Date, and Practical Introduction to Business Analytics with SAS

- Covers both core concepts and modern SAS-based techniques
- Presents strategies and best practices for descriptive, predictive, and prescriptive analytics
- For all beginning-to-intermediate-level analysts and analytics managers and for MBA/Masters or advanced undergraduate students

This guide brings together all the business analytics knowledge and SAS techniques you need to gain valuable intelligence for competitive advantage in decision making.

Starting with the basics, the authors offer an up-to-date view of what business analytics is, why it is so valuable, and, most importantly, how it is used. They combine essential conceptual content with clear, step-by-step explanations of how to perform each important statistical task with SAS.

Using SAS-based examples, they identify common challenges that can be addressed by business analytics, illustrate each type of analytics (descriptive, prescriptive, and predictive), and offer indispensable practical guidance for undertaking your own projects.

Business analytics can help you sort through massive amounts of data, identify meaningful patterns, transform patterns into insights, and use those insights to make more profitable decisions. The authors start with a complete conceptual introduction, explaining how business analytics can drive competitive advantage and how to align your organization to make the most of it. You'll find realistic coverage of key managerial and technical issues, from organizational structure to data quality.

Next, you'll master practical methodologies, strategies, and best practices for performing each leading form of analytics with SAS: descriptive, predictive, and prescriptive. Throughout, you'll learn from realistic case studies and solved problems and get hands-on experience with powerful SAS software tools. A capstone SAS-based project integrates key processes and techniques, preparing you to succeed on your own.

- What is business analytics?
- What questions can it answer?
- How can it drive competitive advantage?
- What resources and skills do you need?
- How do you prepare the organization for it?
- What obstacles must you overcome?
- What are the key statistical techniques?
- How do you perform each analytic task with SAS?
- How do you handle entire projects in SAS, from start to finish?
