Lisp in Small Pieces By Christian Queinnec

This is a comprehensive account of the semantics and the implementation of the whole Lisp family of languages, namely Lisp, Scheme and related dialects. It describes 11 interpreters and 2 compilers, including very recent techniques of interpretation and compilation. The book is in two parts. The first starts from a simple evaluation function and enriches it with multiple name spaces, continuations and side-effects with commented variants, while at the same time the language used to define these features is reduced to a simple lambda-calculus. Denotational semantics is then naturally introduced. The second part focuses more on implementation techniques and discusses precompilation for fast interpretation: threaded code or bytecode; compilation towards C. Some extensions are also described such as dynamic evaluation, reflection, macros and objects. This will become the new standard reference for people wanting to know more about the Lisp family of languages: how they work, how they are implemented, what their variants are and why such variants exist. The full code is supplied (and also available over the Net). A large bibliography is given as well as a considerable number of exercises. Thus it may also be used by students to accompany second courses on Lisp or Scheme.

Users Review

From reader reviews:

Jennifer Bryan:

As people who live in the actual modest era should be revise about what going on or information even knowledge to make these keep up with the era which can be always change and move forward. Some of you maybe can update themselves by examining books. It is a good choice for yourself but the problems coming to you actually is you don't know what one you should start with. This Lisp in Small Pieces is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

Randall Hernandez:

Playing with family in a very park, coming to see the coastal world or hanging out with buddies is thing that usually you have done when you have spare time, and then why you don't try factor that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Lisp in Small Pieces, it is possible to enjoy both. It is good combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout guys. What? Still don't buy it, oh come on its called reading friends.

Christina Vallejo:

Are you kind of hectic person, only have 10 or maybe 15 minute in your time to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are receiving problem with the book in comparison with can satisfy your limited time to read it because this time you only find reserve that need more time to be study. Lisp in Small Pieces can be your answer since it can be read by you who have those short time problems.

Dorothy Penland:

That e-book can make you to feel relax. This book Lisp in Small Pieces was multi-colored and of course has

pictures around. As we know that book Lisp in Small Pieces has many kinds or category. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading this.
