The European Garden Flora Flowering Plants: A Manual for the Identification of Plants Cultivated in Europe, Both Out-of-Doors and Under Glass (Volume 1) From Brand: Cambridge University Press

The European Garden Flora is the definitive manual for the accurate identification of cultivated ornamental flowering plants. Designed to meet the highest scientific standards, the vocabulary has nevertheless been kept as uncomplicated as possible so that the work is fully accessible to the informed gardener as well as to the professional botanist. This new edition has been thoroughly reorganised and revised, bringing it into line with modern taxonomic knowledge. Although European in name, the Flora covers plants cultivated in most areas of the United States and Canada as well as in non-tropical parts of Asia and Australasia. Volume I contains accounts of all the Monocotyledons, which includes those groups known informally as the 'petaloid monocotyledons' (the Liliaceae and Amaryllidaceae in the first edition, divided here among 17 families), the grasses and sedges (Gramineae and Cyperaceae), the aroids (Araceae) and the large and diverse Orchidaceae.

Editorial Review

About the Author

James Cullen has been a professional plant taxonomist for over 50 years, working particularly on the classification and identification of plants in cultivation (especially Rhododendron) at Liverpool and Edinburgh Universities, at the Royal Botanic Garden, Edinburgh, and in Cambridge. With the late Dr S. M. Walters, he was the initiator of the first edition of The European Garden Flora and is responsible for two spin-offs, The Orchid Book (1992) and Manual of North European Garden Plants (2001).

Sabina Knees is a taxonomist at the Royal Botanic Garden, Edinburgh and although now working on plants of the Middle East, particularly the flora of the Arabian Peninsula and Socotra, she spent over 20 years working as a horticultural taxonomist for the Royal Horticultural Society and the Royal Botanic Garden, Edinburgh and is a founder member of the Horticultural Taxonomy Group (HORTAX). She was editor of The New Plantsman for seven years and worked initially as a research associate and then as a member of the editorial committee on the first edition of The European Garden Flora.

Suzanne Cubey has worked at the Royal Botanic Garden, Edinburgh (RBGE) since 1987, originally as a researcher, and then later becoming the Assistant Secretary on the Editorial Board for the first edition of The European Garden Flora. Since 2005 her main role has been as Assistant Herbarium Curator with particular responsibility for the cultivated plants, where she curates the cultivated specimens in the RBGE herbarium and manages the vouchering of research material from the living collections.

Users Review

From reader reviews:

Gary McKinney:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each reserve has different aim or goal; it means that book has different type. Some people experience enjoy to spend their time for you to read a book. These are reading whatever they consider because their hobby is actually reading a book. Think about the person who don't like reading a book?
