### The Magic School Bus and the Science Fair Expedition (Magic School Bus)

By Joanna Cole

It's the 20th Anniversary of The Magic School Bus! Celebrate this groundbreaking series with the Friz's class as they meet some of history's greatest minds and learn what it takes to be a scientist.

What do Galileo, Isaac Newton, Louis Pasteur, and Albert Einstein have in common? They've all ridden on the Magic School Bus, of course!

Ms. Frizzle is back in action and she has a mission: her students need science fair projects - and fast. What better way to get ideas than to learn from some of the all-time greats? The class heads to the Walkerville Science Museum to see the exhibit on GREAT SCIENTISTS THROUGH THE AGES, where, suddenly, Galileo comes to life! He is about to make a great discovery, but he needs a ride home. Thank goodness Ms. Frizzle knows the way! (cont.)

### Editorial Review

From [Booklist](#)

It has been 20 years since the publication of *The Magic School Bus at the Waterworks* (1986), the first title in the groundbreaking series that has covered a variety of science topics, including geology, weather, dinosaurs, bees, and the human body. This installment widens the lens to encompass the whole field of science. As usual, the story begins in the classroom, where the students are agonizing over the upcoming science fair. A field trip to the nearby science museum provides inspiration, and in the galleries, the class discovers a model school bus, which conveys the crew back through time, where they meet famous scientists, such as Galileo and the Curies, and witness pivotal discoveries. This has all the hallmarks of the winning series: humorous cartoon speech bubbles; instructive, funny, appealing illustrations; and clear language that explains basic concepts without condescension. An excellent introduction to scientists and what they do, this title cements the series' long-standing reputation as one of the most exciting, approachable elementary-school science resources. *Gillian Engberg*
