Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment By Ferhan Cecen, Ouml;zgür Aktas

This monograph provides comprehensive coverage of technologies which integrate adsorption and biological processes in water and wastewater treatment. The authors provide both an introduction to the topic as well as a detailed discussion of theoretical and practical considerations.

After a review of the basics involved in the chemistry, biology and technology of integrated adsorption and biological removal, they discuss the setup of pilot- and full-scale treatment facilities, covering powdered as well as granular activated carbon. They elucidate the factors that influence the successful operation of integrated systems. Their discussion on integrated systems expands from the effects of environmental to the removal of various pollutants, to regeneration of activated carbon, and to the analysis of such systems in mathematical terms. The authors conclude with a look at future needs for research and development.

A truly valuable resource for environmental engineers, environmental and water chemists, as well as professionals working in water and wastewater treatment.

Editorial Review

From the Back Cover

This monograph provides comprehensive coverage of technologies which integrate adsorption and biological processes in water and wastewater treatment. The authors provide both an introduction to the topic as well as a detailed discussion of theoretical and practical considerations.

After a review of the basics involved in the chemistry, biology and technology of integrated adsorption and biological removal, they discuss the setup of pilot- and full-scale treatment facilities, covering powdered as well as granular activated carbon. They elucidate the factors that influence the successful operation of integrated systems. Their discussion on integrated systems expands from the effects of environmental to the removal of various pollutants, to regeneration of activated carbon, and to the analysis of such systems in mathematical terms. The authors conclude with a look at future needs for research and development.

A truly valuable resource for environmental engineers, environmental and water chemists, as well as professionals working in water and wastewater treatment.

About the Author

Ferhan Cecen is currently a professor at the Institute of Environmental Sciences, Bogazici University in Istanbul, where she received a B.Sc. degree in chemical engineering. She gained her M.Sc. and Ph.D. degrees in environmental engineering from Istanbul Technical University. She has published extensively on the nitrification, denitrification, biological and advanced treatment of industrial wastewaters, adsorption of pollutants from water and wastewater, as well as on the biodegradation of hazardous pollutants, and the impact of heavy metals and organochlorine compounds on activated sludge and biofilm systems. Over the past decade, her research has focused on the integration of adsorption with biological treatment processes in both wastewater and water treatment.

Özgür Aktas is currently a researcher at the Environment Institute of TUBITAK Marmara Research Center. Previously he was a research assistant at the Institute of Environmental Sciences in Bogazici University. He received his B.Sc. degree in Chemical Engineering and M.Sc. and Ph.D. degrees in Environmental Technology from the Institute of Environmental Sciences, Bogazici University in Istanbul. His research focuses on activated carbon adsorption in biological processes and bioregeneration of activated carbon in these combined systems.

Users Review

From reader reviews:

Bobbie Flores:

Here thing why this particular Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment are different and reliable to be yours. First of all examining a book is good but it really depends in the content than it which is the content is as delicious as food or not. Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment giving you information deeper and different ways, you can find any publication out there but there is no reserve that similar with Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and

Biological Treatment. It gives you thrill reading journey, its open up your own personal eyes about the thing that happened in the world which is possibly can be happened around you. You can actually bring everywhere like in park, café, or even in your means home by train. When you are having difficulties in bringing the published book maybe the form of Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment in e-book can be your option.

Robert Berman:

Do you have something that you like such as book? The publication lovers usually prefer to opt for book like comic, small story and the biggest one is novel. Now, why not striving Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment that give your fun preference will be satisfied by reading this book. Reading behavior all over the world can be said as the way for people to know world far better then how they react to the world. It can't be said constantly that reading addiction only for the geeky particular person but for all of you who wants to possibly be success person. So , for all of you who want to start examining as your good habit, you could pick Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment become your own starter.

Carla Heyward:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book than can satisfy your short space of time to read it because this all time you only find guide that need more time to be learn. Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment can be your answer mainly because it can be read by anyone who have those short free time problems.

Ryan Walker:

A number of people said that they feel weary when they reading a e-book. They are directly felt the item when they get a half areas of the book. You can choose typically the book Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment to make your current reading is interesting. Your personal skill of reading skill is developing when you similar to reading. Try to choose very simple book to make you enjoy to study it and mingle the sensation about book and reading through especially. It is to be initial opinion for you to like to open a book and study it. Beside that the reserve Activated Carbon for Water and Wastewater Treatment: Integration of Adsorption and Biological Treatment can to be your brand new friend when you're really feel alone and confuse with the information must you're doing of these time.
