Stoichiometry: 5e By B I Bhatt

"The text authored by Prof. Bhatt is one of the established texts available in the market on the subject of Stoichiometry. It has withstood the time period of almost 33 years and has been constantly revised and updated at regular intervals to incorporate the contemporary changes related to the subject. The text has been prescribed in the syllabi of major universities and prestigious autonomous institutions. The author has explained different stoichiometric concepts with the help of practical and industrial examples rather than those which merely represent simple hypothetical problems. The statements of the problems (solved and unsolved both) are based on the technical articles from reputed journals so that readers get actual feel of industrial problems. The text has been thoroughly revised to cover latest data published in the recent past in reputed journals. For example, the revised Atomic Weights as per 2005 published IUPAC data, Data for many gases at high pressures and temperatures (non-ideal conditions) presented from NIST REFPROP, Ver. 8, 2007 (a special software which accurately gives properties for many compounds and their mixtures) and so on. In each chapter new examples are included in solved category as well as in exercises. Block diagrams on stoichiometry with industrial problems have been included. Linear model for solving material balance problems are introduced. Use of Matrix algebra in solving these problems (with or without chemical reactions) with mathematical softwares; such as Mathcad, Matlab is covered with examples. Hence, it has the distinction of being the most updated and contemporary text on Stoichiometry and in accordance with the syllabi of major Universities all across India."

Editorial Review

Users Review

From reader reviews:

Lorenzo Davis:

Hey guys, do you wish to find a new book to study? Maybe the book with the name Stoichiometry: 5e suitable to you? Typically the book was written by a famous writer in this era. Often the book titled Stoichiometry: 5e is one of several books that everyone reads now. This kind of book has inspired many people in the world. When you read this reserve you will enter the new dimensions that you never knew ahead of. The author explained their thoughts in a simple way, consequently all of us can easily know the core of this reserve. This book will give you a lot of information about this world now. To help you see the representation of the world with this book.

Sarah Jackson:

Your reading sixth sense will not betray anyone, why because this Stoichiometry: 5e book written by a well-known writer whose goal is to say well how to make a book which can be understood by anyone who reads the book. Written throughout in good manner for you, still dripping with every idea and creating skill only to eliminate your own hunger then you still doubt Stoichiometry: 5e as a good book not only by the cover but also through the content. This is one book that can break don't judge a book by its cover, so do you still need one more sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listen to one more sixth sense.

Brian Faber:

You can spend your free time to study this book this e-book. This Stoichiometry: 5e is simple to bring you can read it in the area, in the beach, train and also soon. If you did not possess much space to bring the particular printed book, you can buy the actual e-book. It is made easier to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Jackie Frost:

You can get this Stoichiometry: 5e by visiting the bookstore or Mall. Just simply viewing or reviewing it can be your solve challenge if you get difficulties on your knowledge. Kinds of this guide are various. Not only by written or printed but in addition can you enjoy this book simply by e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose correct ways for you.
