Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy) From Brand: Woodhead Publishing

Carbon dioxide (CO₂) capture and storage (CCS) is the one advanced technology that conventional power generation cannot do without. CCS technology reduces the carbon footprint of power plants by capturing, and storing the CO₂ emissions from burning fossil-fuels and biomass. This volume provides a comprehensive reference on the state of the art research, development and demonstration of carbon storage and utilisation, covering all the storage options and their environmental impacts. It critically reviews geological, terrestrial and ocean sequestration, including enhanced oil and gas recovery, as well as other advanced concepts such as industrial utilisation, mineral carbonation, biofixation and photocatalytic reduction.

- Foreword written by Lord Oxburgh, Climate Science Peer
- Comprehensively examines the different methods of storage of carbon dioxide (CO₂) and the various concepts for utilisation
- Reviews geological sequestration of CO₂, including coverage of reservoir sealing and monitoring and modelling techniques used to verify geological sequestration of CO₂

Editorial Review

Review

The development of CCS worldwide must go ahead at a pace unprecedented in large-scale technology investment and that needs unprecedented levels of knowledge transfer. This book makes a significant contribution., Dr Jeff Chapman, The Carbon Capture & Storage Association, UK

About the Author

Professor M. M. Maroto-Valer holds the Robert M. Buchan Chair in Sustainable Energy Engineering and is Head of the Institute of Mechanical, Process and Energy Engineering (IMPEE), School of Engineering & Physical Sciences, Heriot-Watt University, UK. She is noted for her research into energy and environmental technologies, with particular emphasis on carbon management.

Users Review

From reader reviews:

Jerold Richards:

Book is to be different for each and every grade. Book for children until finally adult are different content. As we know that book is very important for people. The book *Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy)* has been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The guide *Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy)* is not only giving you considerably more new information but also to get your friend when you truly feel bored. You can spend your current spend time to read your e-book. Try to make relationship with all the book *Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy)*. You never truly feel lose out for everything if you read some books.

Sharon Stennis:

Do you have something that you want such as book? The reserve lovers usually prefer to decide on book like comic, brief story and the biggest one is novel. Now, why not seeking *Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy)* that give your entertainment preference will be satisfied by reading this book. Reading habit all over the world can be said as the opportunity for people to know world a great deal better then how they react when it comes to the world. It can't be explained constantly that reading behavior only for the geeky man or woman but for all of you who wants to possibly be success person. So , for all you who want to start examining as your good habit, you could pick *Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy)* become your personal starter.

Barbara Saddler:

This Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy) is great publication for you because the content that is certainly full of information for you who all always deal with world and have to make decision every minute. This book reveal it info accurately using great organize word or we can claim no rambling sentences inside it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only offers you straight forward sentences but difficult core information with attractive delivering sentences. Having Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy) in your hand like finding the world in your arm, details in it is not ridiculous 1. We can say that no book that offer you world throughout ten or fifteen minute right but this publication already do that. So , it is good reading book. Heya Mr. and Mrs. busy do you still doubt in which?

Jamie Wallace:

Many people spending their time by playing outside along with friends, fun activity with family or just watching TV the entire day. You can have new activity to invest your whole day by looking at a book. Ugh, do you consider reading a book will surely hard because you have to use the book everywhere? It alright you can have the e-book, having everywhere you want in your Cell phone. Like Developments and Innovation in Carbon Dioxide (CO₂) Capture and Storage Technology: Carbon Dioxide (Co₂) Storage and Utilisation (Woodhead Publishing Series in Energy) which is keeping the e-book version. So , try out this book? Let's see.
