Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) From Woodhead Publishing

Microbiological risk assessment (MRA) is one of the most important recent developments in food safety management. Adopted by Codex Alimentarius and many other international bodies, it provides a structured way of identifying and assessing microbiological risks in food. Edited by two leading authorities, and with contributions by international experts in the field, Microbiological risk assessment provides a detailed coverage of the key steps in MRA and how it can be used to improve food safety.

The book begins by placing MRA within the broader context of the evolution of international food safety standards.

Part one introduces the key steps in MRA methodology. A series of chapters discusses each step, starting with hazard identification and characterisation before going on to consider exposure assessment and risk characterisation. Given its importance, risk communication is also covered. Part two then considers how MRA can be implemented in practice. There are chapters on implementing the results of a microbiological risk assessment and on the qualitative and quantitative tools available in carrying out a MRA. It also discusses the relationship of MRA to the use of microbiological criteria and another key tool in food safety management, Hazard Analysis and Critical Control Point (HACCP) systems.

With its authoritative coverage of both principles and key issues in implementation, Microbiological risk assessment in food processing is a standard work on one of the most important aspects of food safety management.

- Provides a detailed coverage of the key steps in microbiological risk assessment (MRA) and how it can be used to improve food safety
- Places MRA within the broader context of the evolution of international food safety standards
- Introduces the key steps in MRA methodology, considers exposure assessment and risk characterisation, and covers risk communication

Editorial Review

Review

...highly recommended to all scientists and practitioners in food industry, academia and authorities as an indispensable guide in this special field., *Advances in Food Research*

...written by the 'who's who' of risk assessment., *Food Technology*

Whether you're a researcher, food technology student or a safety decision maker, this book offers valuable resources for everyone., *Food Technology*

About the Author

Martyn Brown was formerly a Senior Microbiologist at Unilever Savoury Global Supply Chain and Technology Group, UK. Now a consultant, he is an internationally-known authority on the management of food safety.

Dr Mike Stringer is Director of the Food Technology Division at the internationally-renowned Campden and Chorleywood Food Research Association.

Users Review

From reader reviews:

Dorathy Byers:

Here thing why this particular Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) are different and reliable to be yours. First of all looking at a book is good but it really depends in the content from it which is the content is as delicious as food or not. Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) giving you information deeper including different ways, you can find any publication out there but there is no publication that similar with Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition). It gives you thrill reading through journey, its open up your current eyes about the thing which happened in the world which is might be can be happened around you. You can bring everywhere like in park, café, or even in your way home by train. In case you are having difficulties in bringing the published book maybe the form of Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) in e-book can be your alternate.

Matthew Coleman:

Now a day people who Living in the era wherever everything reachable by connect with the internet and the resources in it can be true or not demand people to be aware of each info they get. How a lot more to be smart in acquiring any information nowadays? Of course the answer is reading a book. Reading through a book can help people out of this uncertainty Information mainly this Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) book since this book offers you rich information and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you may already know.

Susan Chestnut:

Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) can be one of your beginner books that are good idea. We recommend that straight away because this publication has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining however delivering the information. The copy writer giving his/her effort that will put every word into pleasure arrangement in writing Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition) yet doesn't forget the main point, giving the reader the hottest in addition to based confirm resource info that maybe you can be one among it. This great information may drawn you into new stage of crucial thinking.

Tia Sargent:

What is your hobby? Have you heard in which question when you got college students? We believe that that problem was given by teacher to the students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as looking at become their hobby. You should know that reading is very important and also book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You see good news or update with regards to something by book. Amount types of books that can you take to be your object. One of them is Microbiological Risk Assessment in Food Processing (Woodhead Publishing Series in Food Science, Technology and Nutrition).
