Concrete Structures By Mehdi Setareh, Robert M. Darvas

Based on the latest ACI Code, *Concrete Structures* takes a step-by-step approach to exploring the design and analysis of reinforced concrete structures and elements. Ideal for engineering, architectural engineering, building construction, and architecture students, it covers concrete technology, analysis and design of reinforced concrete beams, slabs, columns, footings, and walls. It also introduces the different types of reinforced concrete floor systems and the fundamentals of pre-stressed concrete structures. Unique self-experiments and realistic problems help readers further understand concrete's structural significance and potential as a building material. Includes the most recent methods of design and analysis of reinforced concrete structures and is based on the American Concrete Institute Code (ACI 318-05). Easy to follow using a step-by-step, non-calculus approach. Includes a series of experiments readers can conduct on their own to comprehend concrete's structural significance and understand more about concrete as a building material. Practicing architects and engineers, in particular individuals preparing for the licensing exams. People interested in the building design and construction can also benefit from the book as it follows a step by step approach in the design and analysis of concrete structures.

Editorial Review

About the Author

Dr. Mehdi Setareh is a Professor and member of the faculty of the College of Architecture and Urban Studies at the Virginia Polytechnic Institute and State University (Virginia Tech). He received his B.Sc. in Structural Engineering from the Technical University of Tehran, Iran in 1980, M.Sc. in Structural Engineering from the University of Surrey, Guildford, U.K. in 1985, and Ph.D. in Structural Engineering from the University of Michigan, Ann Arbor in 1990. Dr. Setareh has taught undergraduate and graduate level structures and building systems courses to architecture and engineering students since 1990. His *Structural Technology* seminars have provided continuing education to hundreds of practicing architects throughout the U.S., in addition to helping them prepare for the Architecture Registration Examination.

Dr. Setareh is a licensed professional engineer in states of Virginia and Michigan, and a member of the American Society of Civil Engineers, and the American Concrete Institute. He has over twenty years of experience in the analysis and design of various structures using computer technology. His research on different aspects of building structures have been sponsored by the various federal and state agencies in addition to professional organizations and private industries. He has received awards for his scholarly contribution to the field of structural engineering and has numerous publications in technical journals and conference proceedings.

Robert M. Darvas, is Professor Emeritus of Architecture (Structures), The University of Michigan, Ann Arbor. Professor Darvas served from 1983 to 1986 as Chairman of the Architecture Program. He is a Registered Structural and Professional Engineer in 11 States. He is a member of the American Society of Civil Engineers Committee on Special Structures; also serves on the Task Committee on Tensioned Fabric Structures. Professor Darvas is well recognized for his innovative and outstanding structural designs, in many different structural media; he has received numerous honor and merit awards for designs executed in reinforced concrete, prestressed concrete, steel and timber. College buildings, libraries, churches, museums, public buildings, hotels, and convention centers are among his notable accomplishments. He also received two awards for his outstanding teaching. He has lectured widely in the US and overseas. His work has been widely published in journals and cited in books. He is a member of the American Concrete Institute.

Users Review

From reader reviews:

Ebony Lower:

Reading can called mind hangout, why? Because when you find yourself reading a book mainly book entitled Concrete Structures your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely can become your mind friends. Imaging just about every word written in a reserve then become one type conclusion and explanation which maybe you never get previous to. The Concrete Structures giving you an additional experience more than blown away the mind but also giving you useful information for your better life with this era. So now let us explain to you the relaxing pattern this is your body and mind are going to be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?

Wesley McFarland:

This Concrete Structures is great e-book for you because the content which can be full of information for you who else always deal with world and have to make decision every minute. This book reveal it info accurately using great manage word or we can point out no rambling sentences inside. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tough core information with attractive delivering sentences. Having Concrete Structures in your hand like obtaining the world in your arm, info in it is not ridiculous one particular. We can say that no publication that offer you world throughout ten or fifteen small right but this guide already do that. So , this is certainly good reading book. Heya Mr. and Mrs. stressful do you still doubt in which?

Beatrice Raybon:

In this era globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you personally is Concrete Structures this e-book consist a lot of the information in the condition of this world now. This kind of book was represented so why is the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Typically the writer made some exploration when he makes this book. Honestly, that is why this book appropriate all of you.

Nancy Thornton:

Don't be worry if you are afraid that this book may filled the space in your house, you could have it in e-book approach, more simple and reachable. This kind of Concrete Structures can give you a lot of pals because by you taking a look at this one book you have factor that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This reserve offer you information that probably your friend doesn't know, by knowing more than some other make you to be great persons. So , why hesitate? Let us have Concrete Structures.
