The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e By Joyce L. Mulholland MS RN ANP MA, Susan Turner RN MSN FNP

Use the simplicity of the dimensional analysis method to minimize drug calculation errors! **The Nurse, The Math, The Meds, 3rd Edition** helps you overcome any math anxiety you may have by clearly explaining how to use the dimensional analysis method. It shows how to analyze practice problems, find the reasonable answer, and then evaluate it. But first, it lets you refresh your math skills with a review of essential math. Written by noted nursing educator Joyce Mulholland, this book offers over 1,400 questions for plenty of practice in mastering math concepts and learning dosage calculations.

- **Mnemonics** throughout the text facilitate memorization and conserve learning time.
- **Red arrow alerts** call attention to critical math and patient safety theory to increase student awareness of potential errors and patient safety issues.
- **High-risk drug icons** serve as visual reminders of high-risk drugs in the text.
- **UNIQUE! FAQs and answers** break up the text, add to comprehension, and provide additional necessary knowledge for students studying both inside and outside of a classroom environment.
- **UNIQUE! Ask Yourself questions** synthesize and reinforce comprehension of content.
- **UNIQUE! Communication boxes** display sample nurse-patient, nurse-prescriber dialogues that help reduce medication errors and relate the math to the medications and to clinical application.
- **Multiple-choice review** at the end of each chapter supplies a multiple-choice format review for NCLEX exam preparation.
- **Chapter final** supplies you with a final practice over material covered in the entire chapter so you can evaluate understanding of chapter content.
- **Comprehensive final practice** at the end of the text covers major concepts and offers additional practice for overall evaluation of learning.
- **Rapid Practice exercises** follow each new topic presented in each chapter to encourage and allow drug calculation and math concepts to be completed in one sitting.
- Consistent **chapter format** provides you with a quick overview of chapter

contents including objectives, estimated time to complete chapter, an introduction and essential vocabulary.

- **A comprehensive math review section** includes a self-assessment test designed to help you identify areas of strength and weakness in competency of basic math.
- **Early introduction of the dimensional analysis method** with basic practice problems in chapter 2 facilitates application of the dimensional analysis method to various types of medication-related calculations.
- **TJC and ISMP recommendations** help reduce medication errors, increase patient safety, and ensure compliance with agency regulations.
- **Full-color design**, bold print, boxed material, and ample space to work out the practice problems make navigating chapters easy and mastering content more effective.
- **Test tips** throughout the text enhance comprehension and improve test-taking skills.
- **Cultural boxes** describe selected math notation and medication related cultural practices to help reduce math-related reading errors while broadening your cultural perspective.
- **Clinical Relevance boxes** expand your perception of the medication-related nurse's role while motivating interest, and increasing awareness of safety issues.
- Website and other applicable **references** at the end of each chapter offer extra resources for further medication-related theory.
- **NEW and UPDATED!** Examples in *Dimensional Analysis Method* chapter have been revised for clarity with consistent format of equations.
- **NEW and UPDATED! Practice problems** in parenteral nutrition, advanced intravenous calculations, anticoagulants, blood administration, diabetic meds, and pediatric have been incorporated throughout the text.
- **NEW and UPDATED! Medication labels and photos** keep you up-to-date on the latest medications in use today.
- **NEW and UPDATED! Current medication-related patient safety trends** from QSEN, TJC, ISMP and NLN.
- **NEW! Reorganized answer key** places answers and the work to practice problems at the end of each chapter for easier accessibility.

Editorial Review

Users Review

From reader reviews:

Brian Kelley:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each reserve has different aim as well as goal; it means that guide has different type. Some people truly feel enjoy to spend their time for you to read a book. These are reading whatever they consider because their hobby is actually reading a book. How about the person who don't like studying a book? Sometime, man feel need book when they found difficult problem or perhaps exercise. Well, probably you will need this The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e.

William Martin:

This The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e are generally reliable for you who want to certainly be a successful person, why. The reason why of this The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e can be one of many great books you must have will be giving you more than just simple studying food but feed anyone with information that might be will shock your before knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions throughout the e-book and printed types. Beside that this The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e giving you an enormous of experience for example rich vocabulary, giving you trial of critical thinking that we realize it useful in your day exercise. So , let's have it and enjoy reading.

Clarence Danner:

This book untitled The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e to be one of several books which best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit upon it. You will easily to buy this book in the book retailer or you can order it by way of online. The publisher of this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smartphone. So there is no reason to you to past this guide from your list.

Michelle Shaw:

You can get this The Nurse, The Math, The Meds: Drug Calculations Using Dimensional Analysis, 3e by go to the bookstore or Mall. Just viewing or reviewing it could possibly to be your solve difficulty if you get

difficulties for ones knowledge. Kinds of this book are various. Not only by written or printed but also can you enjoy this book by e-book. In the modern era just like now, you just looking of your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose suitable ways for you.
