## Fundamentals of Speaker Recognition By Homayoon Beigi

An emerging technology, Speaker Recognition is becoming well-known for providing voice authentication over the telephone for helpdesks, call centres and other enterprise businesses for business process automation.

"Fundamentals of Speaker Recognition" introduces Speaker Identification, Speaker Verification, Speaker (Audio Event) Classification, Speaker Detection, Speaker Tracking and more. The technical problems are rigorously defined, and a complete picture is made of the relevance of the discussed algorithms and their usage in building a comprehensive Speaker Recognition System.

Designed as a textbook with examples and exercises at the end of each chapter, "Fundamentals of Speaker Recognition" is suitable for advanced-level students in computer science and engineering, concentrating on biometrics, speech recognition, pattern recognition, signal processing and, specifically, speaker recognition. It is also a valuable reference for developers of commercial technology and for speech scientists.

## **Editorial Review**

Review

From the reviews:

"... there is no comprehensive overview of speaker recognition.

Aside from the absence of a complete overview of the technology there is a commercial need for a good reference. The reason is that the commercial market for speaker recognition is growing and a need to have scientists and technology developers who understand and can work with this technology.

It goes into far more technical depth than other publications - mostly because those other publications cover other topics as well.

It is a scholarly book that does not appear to be representing knowledge about the topic through the filter of a specific product or kind of application. That is very good for scientists and scholars. Consequently, it would be a good text book or technical reference."

Judith Markowitz (J. Markowitz Consultants, Chicago, Illinois, USA)

"In short, this publication would be a service to many researchers and practitioners of this science and technology. I do not know of any other book on the subject. I am much impressed with the depth and breadth that the subject is going to be treated as evidenced from its table of contents."

Fereydoun Maali, Ph.D. (ICx Vision Systems, Phoenix, Arizona, USA)

"This book is unique in several respects. It is the most exhaustive text on speaker recognition available. It is also truly self-contained. About a third of the text is devoted to the background information needed for understanding speaker recognition technology. ... this text sets the standard for speaker recognition textbooks. I recommend it both as an introduction to the subject and as a reference on speaker recognition techniques." (Vladimir Botchev, ACM Computing Reviews, January, 2013)

## **Users Review**

**From reader reviews:**

**David Lucero:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important act, like looking for your favorite e-book and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Fundamentals of Speaker Recognition. Try to make the book Fundamentals of Speaker Recognition as your pal. It means that it can to be your friend when you sense alone and beside those of course make you smarter than before. Yeah, it is very fortunated for you personally. The book makes you far more confidence because you can know anything by the book. So , let me make new experience along with knowledge with this book.

**Chad West:**

This book untitled Fundamentals of Speaker Recognition to be one of several books in which best seller in this year, that's because when you read this guide you can get a lot of benefit on it. You will easily to buy this specific book in the book retail outlet or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Cell phone. So there is no reason to you personally to past this e-book from your list.

**Elbert Gibson:**

Reading a publication tends to be new life style within this era globalization. With studying you can get a lot of information that will give you benefit in your life. With book everyone in this world can share their idea. Publications can also inspire a lot of people. Many author can inspire their own reader with their story or perhaps their experience. Not only the storyplot that share in the textbooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors nowadays always try to improve their expertise in writing, they also doing some analysis before they write for their book. One of them is this Fundamentals of Speaker Recognition.

**Teresita Donahue:**
