NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition By J.W. Akitt, B. E. Mann

Keeping mathematics to a minimum, this book introduces nuclear properties, nuclear screening, chemical shift, spin-spin coupling, and relaxation. It is one of the few books that provides the student with the physical background to NMR spectroscopy from the point of view of the whole of the periodic table rather than concentrating on the narrow applications of ^1H and ^{13}C NMR spectroscopy. Aids to structure determination, such as decoupling, the nuclear Overhauser effect, INEPT, DEPT, and special editing, and two dimensional NMR spectroscopy are discussed in detail with examples, including the complete assignment of the ^1H and ^{13}C NMR spectra of D-amygdain.

The authors examine the requirements of a modern spectrometer and the effects of pulses and discuss the effects of dynamic processes as a function of temperature or pressure on NMR spectra. The book concludes with chapters on some of the applications of NMR spectroscopy to medical and non-medical imaging techniques and solid state chemistry of both $I = F1/2$ and $I > F1/2$ nuclei. Examples and problems, mainly from the recent inorganic/organometallic chemistry literature support the text throughout. Brief answers to all the problems are provided in the text with full answers at the end of the book.

Editorial Review

Users Review

From reader reviews:

Kimberly Williams:

Hey guys, do you want to find a new book to see? Maybe the book with the concept NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition suitable to you? The actual book was written by well-known writer in this era. The book entitled NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition is a single of several books that will everyone read now. This particular book was inspired a number of people in the world. When you read this guide you will enter the new dimension that you ever know just before. The author explained their plan in the simple way, therefore all of people can easily to comprehend the core of this publication. This book will give you a wide range of information about this world now. In order to see the represented of the world within this book.

Diana Castillo:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their free time with their family, or their particular friends. Usually they doing activity like watching television, planning to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Can be reading a book may be option to fill your free time/ holiday. The first thing that you ask may be what kinds of book that you should read. If you want to consider look for book, maybe the book entitled NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition can be very good book to read. Maybe it can be best activity to you.

Emma O'Neill:

Do you have something that you enjoy such as book? The book lovers usually prefer to decide on book like comic, limited story and the biggest the first is novel. Now, why not hoping NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition that give your fun preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the way for people to know world better then how they react in the direction of the world. It can't be claimed constantly that reading addiction only for the geeky particular person but for all of you who wants to possibly be success person. So, for every you who want to start looking at as your good habit, it is possible to pick NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition become your own personal starter.

David Gonzales:

Reading a reserve make you to get more knowledge from the jawhorse. You can take knowledge and

information from your book. Book is written or printed or illustrated from each source this filled update of news. On this modern era like now, many ways to get information are available for a person. From media social just like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just looking for the NMR and Chemistry: An introduction to modern NMR spectroscopy, Fourth Edition when you essential it?
