Sand Dune Conservation, Management and Restoration (Coastal Research Library) By J. Patrick Doody

This book deals with the development of temperate coastal sand dunes and the way these have been influenced by human activity. The different states in which the habitat exists both for the beach/foredune and inland dune are reviewed against the pressures exerted upon them. Options for management are considered and the likely consequences of taking a particular course of action highlighted. These options include traditional approaches to the conservation and management of wildlife and landscapes as well as habitat restoration. The way the value of the areas changes under different management regimes is considered mainly from an environmental perspective. Consideration is given to new approaches to management and restoration including adopting a more dynamic approach.

Audience

This book will be of interest to academics, students and professionals concerned with policy formulation and /or actively managing coastal areas.

Editorial Review

Review

From the book reviews:

“The book focuses on dune systems in the northern hemisphere, with case studies from across Europe and North America, as well as consideration of southern hemisphere analogues. ... Each chapter stands alone, with its own reference list, and the text is accompanied by useful color images and diagrams. This book will be a useful reference for professionals working in land management and conservation of sand dunes, as well as students and academics interested in dynamic systems.” (Sarah Taylor, *The Bulletin Your Magazine From The British Ecological Society*, Vol. 45 (2), June, 2014)

From the Back Cover

This book deals with the development of temperate coastal sand dunes and the way these have been influenced by human activity. The different states in which the habitat exists both for the beach/foredune and inland dune are reviewed against the pressures exerted upon them. Options for management are considered and the likely consequences of taking a particular course of action highlighted. Users Review

From reader reviews:

Francis Dawson:

Book is to be different for each grade. Book for children until eventually adult are different content. As it is known to us that book is very important for all of us. The book Sand Dune Conservation, Management and Restoration (Coastal Research Library) was making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The publication Sand Dune Conservation, Management and Restoration (Coastal Research Library) is not only giving you much more new information but also to be your friend when you experience bored. You can spend your personal spend time to read your reserve. Try to make relationship while using book Sand Dune Conservation, Management and Restoration (Coastal Research Library). You never sense lose out for everything when you read some books.

Kimberly Pratt:

This Sand Dune Conservation, Management and Restoration (Coastal Research Library) are generally reliable for you who want to be considered a successful person, why. The reason of this Sand Dune Conservation, Management and Restoration (Coastal Research Library) can be one of the great books you must have is giving you more than just simple examining food but feed you actually with information that perhaps will shock your earlier knowledge. This book will be handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed types. Beside that this Sand Dune Conservation, Management and Restoration (Coastal Research Library) giving you an enormous of experience including rich vocabulary, giving you test of critical thinking that could it useful in your day activity. So , let's have it and luxuriate in reading.

Sean Lee:

The guide untitled Sand Dune Conservation, Management and Restoration (Coastal Research Library) is the book that recommended to you to study. You can see the quality of the e-book content that will be shown to anyone. The language that publisher use to explained their ideas are easily to understand. The writer was did a lot of research when write the book, hence the information that they share to you personally is absolutely accurate. You also could get the e-book of Sand Dune Conservation, Management and Restoration (Coastal Research Library) from the publisher to make you much more enjoy free time.

Scott Burnett:

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just tiny students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that looking at is not important, boring in addition to can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Sand Dune Conservation, Management and Restoration (Coastal Research Library) can make you sense more interested to read.
