**A High School First Course in Euclidean Plane Geometry** By Charles H. Aboughantous

A High School First Course in Euclidean Plane Geometry is intended to be a first course in plane geometry at the high school level. Individuals who do not have a formal background in geometry can also benefit from studying the subject using this book. The content of the book is based on Euclid's five postulates of plane geometry and the most common theorems. It promotes the art and the skills of developing logical proofs. Most of the theorems are provided with detailed proofs. A large number of sample problems are presented throughout the book with detailed solutions. Practice problems are included at the end of each chapter and are presented in three groups: geometric construction problems, computational problems, and theorematical problems. The answers to the computational problems are included at the end of the book. Many of those problems are simplified classic engineering problems that can be solved by average students. The detailed solutions to all the problems in the book are contained in the Solutions Manual. A High School First Course in Euclidean Plane Geometry is the distillation of the author's experience in teaching geometry over many years in U.S. high schools and overseas. The book is best described in the introduction. The prologue offers a study guide to get the most benefits from the book.

### **Editorial Review**

#### **Users Review**

##### **From reader reviews:**

##### **Joanna Weekley:**

Now a day people who Living in the era everywhere everything reachable by interact with the internet and the resources in it can be true or not call for people to be aware of each data they get. How many people to be smart in receiving any information nowadays? Of course the solution is reading a book. Examining a book can help people out of this uncertainty Information especially this A High School First Course in Euclidean Plane Geometry book because this book offers you rich information and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it as you know.

##### **Clemencia Torres:**

People live in this new day time of lifestyle always try to and must have the free time or they will get wide range of stress from both daily life and work. So , when we ask do people have spare time, we will say absolutely without a doubt. People is human not a robot. Then we ask again, what kind of activity have you got when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading books. It can be your alternative inside spending your spare time, often the book you have read is definitely A High School First Course in Euclidean Plane Geometry.

##### **Staci Eager:**

Can you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not as fantastic as in the outside search likes. Maybe you answer may be A High School First Course in Euclidean Plane Geometry why because the great cover that make you consider concerning the content will not disappoint an individual. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

##### **Christine Smith:**

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library or even make summary for some publication, they are complained. Just minor students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading significantly. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you

personally. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this A High School First Course in Euclidean Plane Geometry can make you sense more interested to read.
