Hormones and Reproduction of Vertebrates, Volume 5: Mammals From Academic Press

This series of volumes represents a comprehensive and integrated treatment of reproduction in vertebrates from fishes of all sorts through mammals. It is designed to provide a readable, coordinated description of reproductive basics in each group of vertebrates as well as an introduction to the latest trends in reproductive research and our understanding of reproductive events. Whereas each chapter and each volume is intended to stand alone as a review of that topic or vertebrate group, respectively, the volumes are prepared so as to provide a thorough topical treatment across the vertebrates. Terminology has been standardized across the volumes to reduce confusion where multiple names exist in the literature, and a comprehensive glossary of these terms and their alternative names is provided.

- A complete, essential and up to date reference for research scientists working on vertebrate hormones and reproduction - and on animals as models in human reproductive research
- Covers the endocrinology, neuroendocrinology, physiology, behaviour and anatomy of vertebrate reproduction
- Structured coverage of the major themes for all five vertebrate groups allows a consistent treatment for all
- Special chapters elaborate on features specific to individual vertebrate groups and to comparative aspects, similarities and differences between them

Editorial Review

About the Author

Dr. David Norris has done research in environmental endocrinology and neuroendocrinology for more than 50 years. Dr. Norris is a Professor Emeritus in the Department of Integrative Physiology at the University of Colorado. He received his bachelor's degree from Baldwin-Wallace College and his Ph.D. in 1966 from the University of Washington. Dr. Norris has worked in the area of forensic botany with Dr. Jane H. Bock, since 1982, primarily on developing the use of plant cells in the gastrointestinal tract to aid in homicide investigations. Dr. Norris and Dr. Bock have been involved in investigations in numerous states as well as throughout the State of Colorado. Dr. Norris has been certified as an expert witness in this area for the State of Colorado. With Dr. Bock, Dr. Norris also has consulted on other botanical evidence for criminal investigations. He was elected a Fellow of the American Academy of Forensic Sciences in 2014.

Kristin H. Lopez teaches human reproductive biology through the Department of Integrative Physiology at the University of Colorado-Boulder. With a background in comparative reproduction and endocrinology, she is an editor of the five-volume work *Hormones and Reproduction of Vertebrates* (Academic Press, 2011). Her ongoing work with Colorado Diversity Initiative promotes increased access to higher education of underrepresented students in STEM.

Users Review

From reader reviews:

Lewis Labelle:

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a go walking, shopping, or went to the particular Mall. How about open or even read a book allowed *Hormones and Reproduction of Vertebrates, Volume 5: Mammals*? Maybe it is to be best activity for you. You understand beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have different opinion?

Barbie Brookins:

Reading a book to become new life style in this season; every people loves to study a book. When you learn a book you can get a wide range of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you need to get information about your review, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, as well as soon. The *Hormones and Reproduction of Vertebrates, Volume 5: Mammals* provide you with a new experience in reading a book.

Douglas Quintanar:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just little students that has reading's internal or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Hormones and Reproduction of Vertebrates, Volume 5: Mammals can make you feel more interested to read.

Stephanie Dillard:

What is your hobby? Have you heard which question when you got scholars? We believe that that question was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. Therefore you know that little person like reading or as reading become their hobby. You must know that reading is very important along with book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update concerning something by book. Numerous books that can you choose to use be your object. One of them is actually Hormones and Reproduction of Vertebrates, Volume 5: Mammals.
