Imhotep the African: Architect of the Cosmos By Robert Bauval, Thomas Brophy

In this ground-breaking book, Egyptologist Robert Bauval and astrophysicist Thomas Brophy uncover the mystery of Imhotep, and ancient Egyptian superstar, pharaonic Da Vinci, Michelangelo, Galileo, and Newton all rolled into one. Based on their research at the Step Pyramid Complex at Saqqara, Bauval and Brophy delve into observational astronomy to 'decode' the alignments and other design features of the Step Pyramid Complex, to uncover the true origins and genius of Imhotep. Like a whodunit detective story they follow the clues that take them on an exhilarating magical mystery tour starting at Saqqara, leading them to temples in Upper Egypt and to the stones of Nabta Playa and the black African stargazers who placed them there.

Imhotep the African describes how Imhotep was the ancient link to the birth of modern civilization, restoring him to his proper place at the center of the birthing of Egyptian, and world, civilization.

Editorial Review

Review

"*Imhotep the African* is an archaeological detective story. Bauval and Brophy make the case that the legendary Egyptian physician, architect, and astronomer Imhotep was not only an historical figure but that he was black. This remarkable book challenges many assumptions about life along the Nile, revealing a worldview and technology that was more sophisticated than anything previously imagined." --**Stanley Krippner, Ph.D.**, co-author of *Personal Mythology*

"Bauval and Brophy have once again brought their keen intellectual and scientific skills to bear by examining an aspect of ancient history that contemporary Egyptologists have been either too afraid or too unwilling to investigate. *Imhotep the African* is the perfect sequel to *Black Genesis*, for it presents incontrovertible truths that will either be accepted on their merits or ignored for fear of exposing a house of lies built upon foundations of historical falsehoods. It is evident to many of their colleagues that Robert Bauval and Thomas Brophy are the dynamic duo of independent Egyptologists. They are to be commended for their scholarship and their dogged determination to present an honest assessment of historical events-- even if it flies in the face of conventional dogma." --**Anthony T. Browder**, author and independent Egyptologist

About the Author
