Student Solutions Manual for Mathematics for Economics (MIT Press) By Michael Hoy, John Livernois, Chris McKenna, Ray Rees, Thanasis Stengos

This text offers a comprehensive presentation of the mathematics required to tackle problems in economic analyses. To give a better understanding of the mathematical concepts, the text follows the logic of the development of mathematics rather than that of an economics course. The only prerequisite is high school algebra, but the book goes on to cover all the mathematics needed for undergraduate economics. It is also a useful reference for graduate students.
