Understanding and Deploying LDAP Directory Services, 2nd Edition

By Timothy A. Howes Ph.D., Mark C. Smith, Gordon S. Good

Understanding and Deploying LDAP Directory Services, 2nd Edition By Timothy A. Howes Ph.D., Mark C. Smith, Gordon S. Good

Lightweight Directory Access Protocol (LDAP) is the standard for directory information access and is the underlying protocol for a variety of email systems, Web systems, and enterprise applications. LDAP enables central management of users, groups, devices, and other data, thereby simplifying directory management and reducing the total cost of ownership. *Understanding and Deploying LDAP Directory Services*, written by the creators of the protocol, is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively. The Second Edition builds on this success by acting as an exhaustive resource for designing, deploying, and maintaining LDAP directory services. Topics such as implementation pitfalls, establishing and maintaining user access to information, troubleshooting, and real-world scenarios will be thoroughly explored.

Editorial Review

Amazon.com Review
While early directory standards (such as X.500) offer some cross-platform functionality, none has the flexibility and widespread appeal of Lightweight Directory Access Protocol (LDAP), which is fast becoming a standard part of networked computers. In *Understanding and Deploying LDAP Directory Services*, three experienced engineers share their knowledge of LDAP in theory and practice, effectively defining this fast-emerging technology. If you're planning to work with LDAP in any way--whether as a network manager, a software developer, or an information technology administrator--you need to read and pay attention to this book. It's the last word on LDAP as it stands today.

Since directory services aren't widely understood, this book begins by defining them and explaining what they can do for an organization. The guide then gets into the specifics of how LDAP organizes directories and handles queries. The authors go to great lengths to talk about what information to put in directories, how to validate and maintain it, and how to manage access to it. There's also lots of material on initiating LDAP services and on troubleshooting.

The aft part of this book holds special appeal for software developers, since it talks extensively about how to implement LDAP in both new and existing software. Throughout, the authors pay special attention to data redundancy, security, privacy, and the economic issues involved in an LDAP deployment. The book's real-world focus is cemented by case studies (both historical and semifictional). *--David Wall*

From the Back Cover

Increasingly, organizations are using Lightweight Directory Access Protocol (LDAP) directories as the nerve centers of their computing infrastructures. LDAP--the Internet standard for directory information access--now provides the naming, location, and security traditionally supplied by network operating systems.

In this expanded second edition of the seminal LDAP reference, *Understanding and Deploying LDAP Directory Services,* three LDAP experts explain the protocol and how to apply it effectively in numerous network environments. The book begins with an introduction to directory services and LDAP, including coverage of LDAPv3 extensions and the Netscape Directory Server. It then moves on to explore:

- Designing directory services, including data sources, schema, naming, topology, replication, privacy, and security
- Deploying directory services, including establishing user access to information, implementation pitfalls, and cost analysis
- Maintaining directory services, including backup, disaster recovery, and troubleshooting
- Creating and enabling directory-service applications
- Integrating directory services

Full of practical implementation advice and real-world examples, **Understanding and Deploying LDAP Directory Services, Second Edition,** will give you the necessary footing to successfully implement LDAP directory-service projects.

About the Author

Timothy A. Howes, Ph.D., coinventor of the LDAP protocol, is the cofounder and chief technology officer of Opsware Inc., the leading provider of data center automation software. Previously, Dr. Howes served as vice president of technology for America Online, as chief technology officer of Netscape¿s Server Products division, and as chief architect of several Netscape server products.

Mark C. Smith is the chief architect for directory products at Netscape Communications Corporation, an AOL Time Warner company, where he is responsible for the technical evolution of Netscape Directory Server and several other products and services. Mr. Smith is coauthor of *LDAP: Programming Directory-Enabled Applications with Lightweight Directory Access Protocol* (Macmillan, 1997) and has written many RFCs and Internet Drafts.

Gordon S. Good is a senior software engineer at Opsware, Inc. Before joining Opsware, he worked at Netscape Communications Corporation, where he led the directory-server-replication development team. Gordon has written several RFCs and Internet Drafts.

Users Review

From reader reviews:

Oliver Crites:

As people who live in typically the modest era should be up-date about what going on or data even knowledge to make these keep up with the era that is always change and advance. Some of you maybe may update themselves by reading books. It is a good choice to suit your needs but the problems coming to an individual is you don't know which you should start with. This Understanding and Deploying LDAP Directory Services, 2nd Edition is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

Florence Taylor:

Often the book Understanding and Deploying LDAP Directory Services, 2nd Edition will bring you to the new experience of reading a new book. The author style to clarify the idea is very unique. In case you try to find new book to study, this book very suited to you. The book Understanding and Deploying LDAP Directory Services, 2nd Edition is much recommended to you to learn. You can also get the e-book from the official web site, so you can more readily to read the book.

James Anderson:

The actual book Understanding and Deploying LDAP Directory Services, 2nd Edition has a lot associated with on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the

very famous author. Mcdougal makes some research before write this book. This particular book very easy to read you can get the point easily after perusing this book.

Issac Molina:

In this period globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The actual book that recommended to your account is Understanding and Deploying LDAP Directory Services, 2nd Edition this book consist a lot of the information on the condition of this world now. That book was represented how does the world has grown up. The language styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. That's why this book acceptable all of you.
